CONTROL PRE-COMMISSIONING

Default settings are indicated by *

High-End Trim/Tuning	Time Delay	Daylight Harvesting	Stand-by Light Level Setting	Stand-by Time Setting
20% - 8' height (48' dia.)	10s	*Light sensor disabled	0%	∞
50% - 20' height (40' dia.)	1min	10lux	*10%	1min
75% - 40' height (60' dia.)	*5min	30lux	30%	30min
*100% - 40' height (100' dia.)	15min	50lux	50%	*60min

High-End Trim/Tuning:

Lighting electricity usage can be reduced by 30 percent or more through high-end trim, which sets the maximum light level for each space.

High-end trim/tuning sets the appropriate target brightness for each space to the prefer light levels to minimize glare and increase comfort level.

Time Delay:

The light can be set to stay ON for any period of time between approx. 10sec and the maximum of 60 min. Any movement detected before this time elapses will re-start the timer.

Daylight Harvesting:

The chosen light response threshold can be infinitely from approx. 10-50lux.

Standby Light Level:

How much light is dimmed when no motion is detected.

Stand-by Time:

How much time after dimming will the light will shut off. Up to 60 minutes after the light has dimmed the light will shut off.
